INTRODUCTION TO THE SURVEY			
<p>INTERVIEWER: YOU MUST READ THE FOLLOWING AND GET CONSENT FROM THE HOUSEHOLD HEAD OR OTHER OLDER MEMBER IF THE HOUSEHOLD HEAD WAS NOT PRESENT:</p> <p>Good morning, my name is [.....] and I work for the company ESA Consultores.</p> <p>We are conducting a survey on living conditions and the situation of the energy sector in Honduran families, as well as in other countries. We are conducting this study in 276 cities and communities in Honduras, and, within each location, we visit families randomly selected. The study seeks to report the way in which households use various fuels or electricity, the characteristics of their homes, and demographic data of the household members.</p> <p>This is an independent survey and has no relationship with ENEE or the Energy Company of Honduras.</p> <p>The interview will last approximately one hour and all the details you provide will be completely confidential and does not present any type of risk for you or your family, the information you provide will only be screened by the researchers who analyze the data. Are you willing and allow us to continue with the survey?</p>

D. WILLINGNESS TO PAY FOR A GRID CONNECTION

Respondent should be most knowledgeable member on household electricity.

D.1	Interviewer/CAPI check: Is the household connected to the national grid (ENEE/Energía Honduras)?		Yes.....1 → F.1 No.....2
D.2	Enumerator: Record Respondent ID for this section	<input type="text"/>	Individual ID from Household Roster
<p>Electricity requires several types of payments. There are three parts to the cost of electricity: connection, wiring, and monthly use. In other words, to use electricity you need to have a wire from a meter in your house to the pole first. That is the connection. You also need to have wires to connect appliances within your house to the meter. This is the wiring. Finally, to keep using electricity you must pay for what is used and measured by the meter, or it will be turned off, this is the cost of monthly use. I would like to ask you questions only about the first cost of connecting – getting a wire from the electricity poles to a meter on your house.</p> <p>If you could pay a “lump sum” price for an electricity connection, in other words, you are offered a price and a period of time to decide whether to take this price. If you decide to take the price, you have to pay all at once, after which you are immediately connected. As you answer the next few questions, assume that all other wiring fees and monthly service fees for using electricity, once you have the connection, remain the same as they are now.</p>			
D.3	Would you be willing to pay \${CF} for an electricity connection?		Yes.....1 → D.12 No.....2
